The following is an examiner's statement of reasons for allowance: The prior arts made available do not teach or fairly suggest, alone or in combination, an ultrasonic apparatus for measuring concentration and flow rate of a sample gas including a means for generating trigger signals when the forward and backward waveforms pass over a predetermined level and means for generating forward and backward zero-crossing signals when the forward and backward waveforms pass over a zero level. The prior art also fails to teach or suggest an oxygen concentration system for generating an oxygen enriched gas including a distance between the first and second ultrasonic transmission-reception devices and the respective ends of the pipe portion satisfying the following relation:  $0 < D < f \cdot x^2 / C$ .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
